

GİZEM ŞANGÜR

ABOUT ME

I'm a third year computer engineering student who is always eager to learn, and can't stop without doing the task that is given. Because I'm a good listener, patient and solution-oriented person I trust myself in team works and idea exchanges with my teammates. Additionally, I'm an open-minded person who loves to think so I'm confident about giving alternative solutions to the possible problems that might come out in the projects.
